- (c) worn-out equipment under constant repair;
- (d) increased plant capacity of subtrusts No 1-3-4 and perhaps others.
- Some indication of the tremendous increase in personnel is conveyed by the report according to which subtrusts. No 3-4 Ploesti, formerly belonging to Concordia, at present employ eight thousand workers as against about one thousand in the prenationalization period.
- 5. Because of lack of imports the plants are being ordered to manufacture some specialized equipment for which they are not properly equipped. Also, the manufacture of certain types of equipment is being spread out among many plants indicating a lack of specialized plant capacity.
- 6. Due to the low quality of the material and equipment manufactured locally, the accident frequency rate increased considerably. For these reasons, the cost of labor and manufacture has gone up to such an extent that the Government was forced to inaugurate a serious campaign for reducing costs.
- 7. According to the "Scanteia", the chief Communist daily, of 20 Feb 53. the Resita plant (No 7) exceeded the program up to 1 Feb 53, on the production of pump units and mud pumps for the oil industry by 13.7 percent and 16.6 percent, respectively. In the absence of detailed data in this respect, this information is, of course, meaningless. The honorable title of "Stakhanovite" was granted to 13 workers in this plant during January 1953.

25X1 8. Sovromutilaj is circulating in the West, an export catalogue of equipment manufactured by them, which appears to be a copy of US catalogues. This may represent more of a propaganda gesture than ability to export.
